

GENERAL INFORMATION

author(s)	Gurdebeke S
year	2003
English title	Interdemic variation in genetic structure and life history traits of the forest-dwelling spider <i>Coelotes terrestris</i> (Wider, 1834)
original title	
reference	PhD thesis, Ghent University, Faculty of Sciences, Ghent
pages	172
type	dissertation (d1)
ecosystem service	supporting – biodiversity
keywords	
taxa	<i>Coelotes terrestris</i>
project	PhD thesis Gurdebeke
supervisor	Maelfait J-P, Mertens J
institution	Ghent University, Department of Biology
document	pdf
data	Flora&Fauna.xls

Data on the Aelmoeseneie forest are used in Chapter 8 of the thesis:
