## MATERIALS & METHODS

study area	5d, 5i
time period	27/11/2010, 6/12/2010
goal	Inform the inhabitants of Landskouter of the forest management.
set-up	
data collection	
remarks	

## RESULTS

Beech, ash, sycamore maple, small-leaved lime, sweet cherry, and pedunculate oak were planted in gaps created by the thinning of October 2008. Fertilizer was added to each plant pit.
